TENNE SOLID SURFACE

It is a material that is warm to the touch and similar to natural stone. It is made of two-thirds natural minerals (ATH - aluminium trihydride) and a low percentage of high-resistance resins. This composition gives Tenne solid surface product a number of exclusive features: nil porosity, it is anti-bacterial without any type of additive, it is hard-wearing, highly resistant and easy to repair, only requires minimum maintenance and is easy to clean.

We can create designs with no joins which prevent the spread of bacteria and make cleaning and maintenance easier.

We offer a wide range of colours, including a white finish that stands out for its purity and neutrality in comparison with other similar materials

Natural

This material is made of two-thirds natural minerals (ATH – aluminium trihydride) and a low percentage of high-resistance resins.

Success is not about being the first to do something, but in continuing to build in order to do it better and differently

Antibacterial

Resistant to germs & bacteria. Does not allow the proliferation of germs and bacteria.
Very low volatile organic compounds. (VOCs)
Aseptic.

Suitable for use in operating rooms.
Tenne does not allow bacteria or fungi to grow or spread. This is an intrinsic property of the composition of the material, without the need for additives to achieve this permanent effect.
This makes it an ideal material for locations with demanding hygiene and sanitation requirements, such as operating theatres or clean rooms.

Ecological

Solid surface is an eco-friendly material, being made up of two thirds natural minerals. Other aspects which make it an environmentally friendly material are that it does not emit volatile organic compounds, and is easy to repair as it can be restored to its original appearance.

Easy to clean

Any normal stain, superficial burn, graffiti or marker pen stain can be removed, immediately returning the surface to its original appearance simply by following the recommended cleaning instructions.

Ultra-white

Tenne offers a degree of whiteness over 99.8%, which in combination with its high refraction index provides a pure, brilliant white that is unique among existing solid surfaces.

- High degree of reflection.
- Natural purity, ultra white.
- High luminosity in the incidence of light.
- White Ideal (CIE)
- Great stability of ring tones

Food grade

Tenne is a food-grade product and meets US and European standards, meaning it can be used in contact with foodstuffs. The applying Tenne is also ideal for rest areas, cafeterias or canteens.

Highly resistant to chemical attack

The material's resistance to chemical attack makes it ideal for use in laboratories, professional facilities and in all types of applications where it is necessary to easily return the surface to its original condition without effort.

Highly resistant to fire

The material's resistance to chemical attack makes it ideal for use in laboratories, professional facilities and in all types of applications where it is necessary to easily return the surface to its original condition without effort.

Resistant to sunlight

Tenne solid surface is a product that is extraordinarily resistant to deterioration caused by UV radiation. The most stable colour is white; please consult the manufacturer for information on other colours.

Inappreciable change in colour (white colours) during 10 years

Resistant to extreme environments

Tenne solid surfaces are capable of withstanding extreme environments, such as marine environments, exposure to steam, immersion in water or freezing conditions, amongst others.

Freedom of design

Tenne can help you to design, create and produce your own product.

Applications

Tenne is a surface devised for creation, and thanks to its exceptional performance qualities it is suited to the commercial and residential sectors. That is why Tenne is the choice of professionals when creating all kinds of bathroom furniture, basin, countertops, toilet for use in projects in commercial premises, hotels, restaurants, hospitals, clinics, public buildings, airports, public transport stations, not forgetting that Tenne is an excellent option for everyday living in our homes.

Certificates

Tenne complies with the most stringent national and international regulations for the installation of solid surface product in different environments. In addition to complying with the most stringent environmental regulations.

CE certificate CE test report CE test report ISO 9001:2015 ISO 14001:2015 ISO 9001:2015 ISO 14001:2015

SOLID SURFACE BATHTUB COLLECTION

COMPANY INTRODUCTION

Our company was Founded in 1973 and headquarter bases in Graz, Austria. Our marketingstrategy aims at high-end bathroom fittings. Since then, we have come to expand our international distribution. We started a joint venture with an experienced and professional team in China's famous building material's center-Foshan to serve the international market with providing brand and project management. We have been manufactured under TUV approved system, marketing high quality bathroom furniture, cast stone bathtubs and basins for 7 years. Located in Foshan, Guangdong, covering more than 15000 sqm with 173 workers, our factory is equipped with newest facilities and an in-house R&D team both in Austria and China.

We have been successfully marketing our products in Europe, United States, Middle East andAsia. Providing products, marketing and project solutions to our customers. We are known for supplying bathroom furniture and fittings to the star hotels in Europe and China.We have become one of the most effective bathroom fittings suppliers for many local and international companies. We are focusing on providing full-service solutions for every customerwho seeks a reliable manufacturer and project management team for their projects. Our aim is to create an exclusive business relationship with our partner. A relationship that is based on trust, support and technical expertise-values which secure successful and long-term partnership.

We have our own R&D team which has more than 15 years in sanitary wares industry. They make sure that we can develop new products to our market, provide product technical support as well as provide customization product solutions to our customers from all over the world.We have a sales team of more than 8-year experience in dealing with world-leading companies, marketing products as well as international project management.

Corian,solid surface is a solid,nonporous,homogeneous surfacing material, composed of 1/3 acrylic resin(also known as polymethyl methacrylate or PMMA), and 2/3 natural mineral. The purpose of this bulletin is to provide information regarding the final composition information for alumina trihydrate filled acrylic-based solid surface known as Corian solid urface .

COMPANY INTRODUCTION

Main component ingredient name,corian solid surface	%
M-phenyl neopentyl glycol polyester	3-6
O-phenyl unsaturated polyester	25-35
Aluminum powder	55-65
Pigment	1-2
Curing agents	1-2
Catalytic agent	1-2

Solid surface construction

- 1.Scratch resistance;
- 2.Shock resistance;
- 3.Non-yellowing;
- 4.Anti-friction;
- 5.Easy cleaning;
- 6.Easy maintance;

59# Lead free brass drain

- 1.U-Shape,anti-Odor;
- 2.Easy install;
- 3.lenth adjustable from 1.2--1.5meter;
- 4.Solid surface cover;

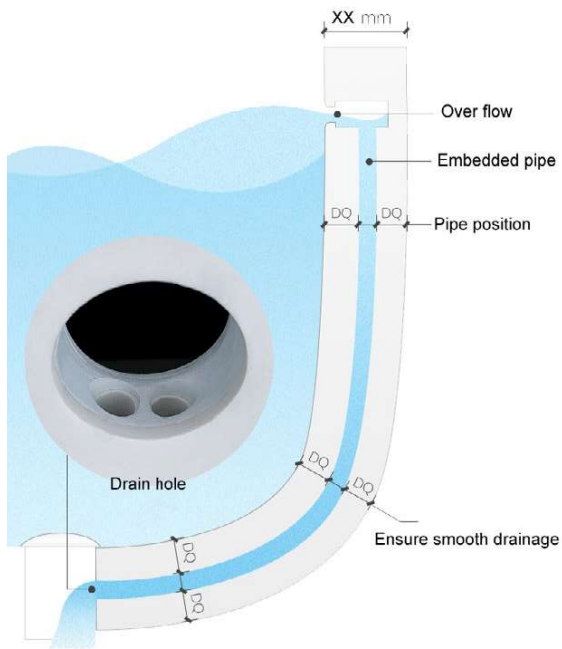

Solid construction

- 1.Bearing more than 300KGS;
- 2.Corrosion resistance, strong abrasion resistance and long service life
3. Five years warranty;

PUP-UP waste

After tens of thousands of bounce test, just lightly press
 Easy to release, durable and not easy to oxidize.

WHY YOU NEED A SOLID SURFACE BATHTUB

Solid surface is a man made material that was first introduced to the market by Dupont in 1967. The main component of acrylic solid surface includes high quality acrylic resin(MMA), aluminum powder and pigments. Solid surface is very popular as kitchen countertops and in modern bathrooms as bathtubs, sinks and vanity tops due to the many advantages including custom colors, durability and its non porous surface.

There are wide range choice of bathtubs on the market such as cast iron bathtubs, acrylic bathtubs, wooden bathtubs and solid surface bathtubs. Bathtubs can also be classified by usage, for example there are whirlpool bathtubs, soaking bathtubs. The most recommended of all of these choices is a solid surface freestanding bathtub. Here is why:

Sleek design

Most solid surface bathtubs in freestanding style come with a sleek modern design. Every piece delivers the designer's creative inspiration and passion to the modern, free lifestyle. A simple stylish freestanding solid surface bathtub sitting in a modern bathroom will greatly enhance the elegance and charming atmosphere of the room.

Ingenious styles to choose from

Solid surface's flexibility with both design and manufacture means it is easy to make into various shapes and styles. This flexibility leads to the diversification of the solid surface bathtub's style, which range from oval and round to rectangular or vessel shaped. With almost any shape you can imagine, a designer can help you to realize this in reality with a unique solid surface bathtub for your bathroom décor.

Custom color available

Not only available in white like many other kinds of bathtub materials, solid surface products can be made into red, black, and many other colors. Even colorful solid surface grains can be put into to the mix to make the surface look colorful. There is also both glossy and matte finishes available to meet with specific demands.

Very durable

A solid surface freestanding bathtub can come with a body between 1.8 and 5cm thick. This means it can undergo decades wear and tear and with careful sanding and polishing, the surface quality can be renewed making it look as good as new even after many years.

Easy to maintain

There is no need to worry about fixing complex spray jets after years like when using a hydro tub, as most solid surface bathtubs are simple in the freestanding style, without complex hydro jets and without hassle. Just like sanitary ware products, routine care will keep your solid surface bathtub in good condition for many years.

Low thermal conduction

Compared to cast iron bathtubs and the cold feeling of the surface, a solid surface bathtub feels warmer and gentler as it has low thermal conduction and can retain heat longer. In conclusion, if you are looking for a unique bathtub for your household or commercial building that represents your style and taste as well as providing high quality use, a solid surface bathtub is the right one for you.

OUR INVENTION

WE ARE SETTING OUT TO REIMAGINE
THE MARKET OF HIGH END BATHTUBS AND SINKS
BY MAKING LUXURY AFFORDABLE.
ECO-FRIENDLY / LIGHT WEIGHT / AFFORDABLE
ECO-FRIENDLY - REDEFINING YOUR SPACE WITH
ENVIRONMENTALLY CONSCIOUS DESIGNS.
LIGHTER WEIGHT MATERIALS - OUR PATENTED
TECHNOLOGY USES
ATHIRD LESS MATERIAL FOR EASY INSTALLATION.
AFFORDABLE - ELEVATED DESIGNS AT
ECONOMICAL PRICES.

DESIGN YOUR BATHROOM AROUND THE BATH DEFINE YOUR WHITE SPACE

IN OLD MOROCCO, BUILDERS USED A UNIQUE PROCESS TO COMBINE LIME FROM MARRAKECH WITH PIGMENT AND BLACK SOAP TO CREATE WHAT WAS CALLED ‘TADELAKT,’ A BEAUTIFUL WATERPROOF PLASTER THAT WAS PLIABLE YET SEAMLESS AND STRONG. SHAPED INTO CURVES AND BEAUTIFUL FORMS OR SIMPLY USED AS A PROTECTIVE SURFACE, IT BECAME SYNONYMOUS WITH LUXURY AND IS STILL USED AS THE TRADITIONAL COATING OF PALACES, HAMMAM BATHHOUSES AND MOROCCO’S OPEN COURTYARD RIADS. IT COULD BE MADE IN VIRTUALLY ANY COLOR, FINISHED TEXTURED OR SMOOTH, WITH A LOOK BOTH ANCIENT AND TIMELESS.

IN MESOPOTAMIA AND SUMERIA, THE FIRST METAL FORGERS LEARNED TO MAKE CASTINGS, SCULPTING BEAUTIFUL PIECES THAT THEY IMMORTALIZED IN THE PRECIOUS METALS OF THEIR DAY.

THESE AGE-OLD TECHNIQUES AND MATERIALS — MODERNIZED WITH ENGINEERING, FORTIFIED WITH ADVANCED, SUPER-STRONG ADDITIVES AND USING NEWLY PATENTED PROCEDURES — FORM THE BASIS OF OUR FABRICATION PROCESS.
