## WHO WE ARE

We are manufacturer of a wide range kitchen and bathroom products in brass material at best value. Such as Kitchen faucet, bathroom faucet, Shower systems and bathroom accessories.

**4,000+sqm<sup>2</sup>**

Production area, 4 lines

**100+**

Skilled colleague

**140+**

Happy and honest partners

**2000+**

Items for your choice

**10+years**

Manufacturing experience

**40+**

Export countries

**4+**

New designs launch/year

**10+**

QC responsible for quality

## Why Tenne?

### Reliability

Established with a team with more than 12 years average experience. Familiar with markets standard, customer requirements.

### Stability

Approximately 120+ committed and experienced staff. With engineer design, casting, machining, polishing and assembling in house. Production are under own control and always delivery on time.

### Affordable Luxury

AQUAVIT is born for looking for the best balance between the quality, design and prices. Aquavit is aiming to make the nice products With good function and affordable for most white collars.

### Warranty

We are confident our products are provide many years of trouble free operation, hence proud to give 10 years warranty for all our faucets and accessories.

### Quality

AQUAVIT source the best component worldwide and all products need to go with 9 times quality control Before shipped out. A Inspection report is also provided to customer before loading.

### Innovation

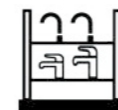

With a team of people dedicated to developing product ranges that innovate in their form and function. The latest Lead free brass, Spot-resistant finish, Magnetic docking, Quick connect and click button technology are available.

## Services.

We understand you are busy and the labor cost are much higher compared with China. So you can count on us for the necessary marketing materials.

# CONTENTS

Bathroom Cabinet  
Shower mixers collections

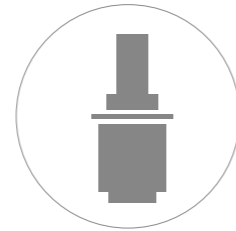

# BASIN MIXER

1

## Environmental protection, low lead, healthy life

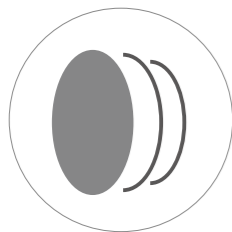

Selected national standard ultra-low lead environmentally friendly brass  
The copper body wall thickness is more than 3mm, and the quality is solid  
and worry-free

2

## Imported spool durable

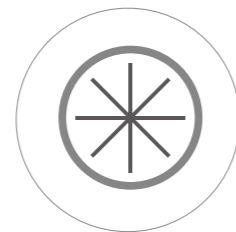

Use imported spool and pass strict switch test

3

## Three-layer electroplating

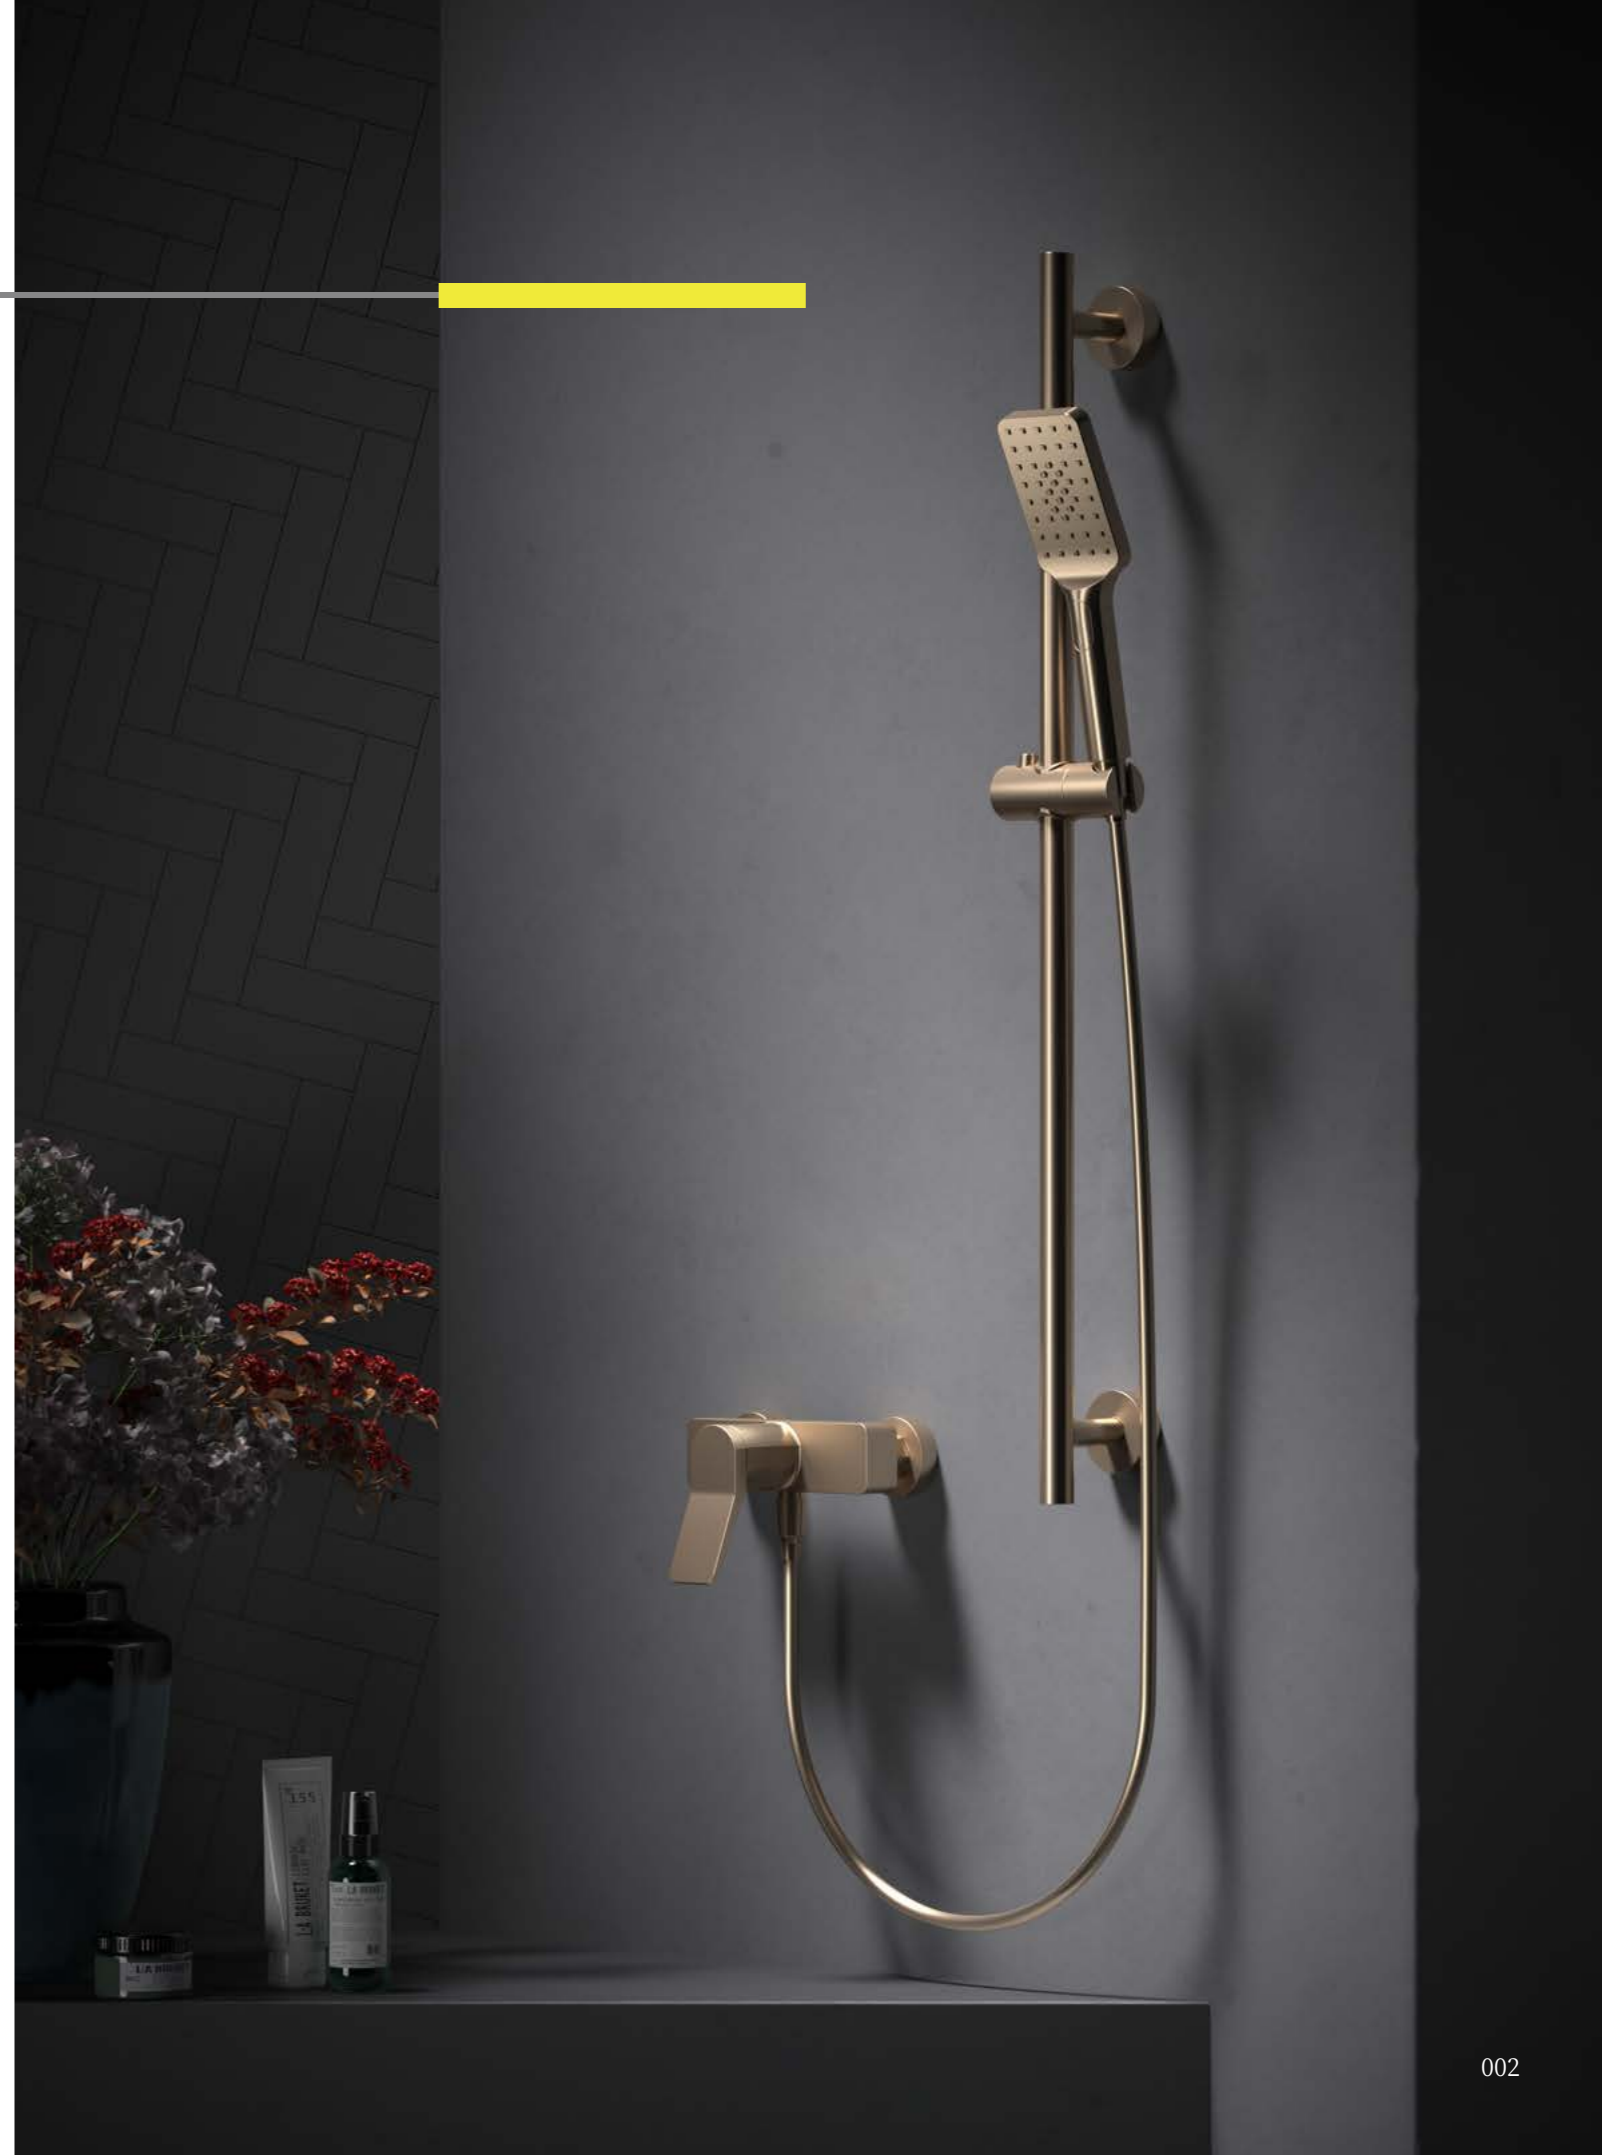

Passed 48 hours corrosion resistance test  
10 level standard electroplating, durable and clean as new

4

## Easy Clean Bubbler Comfortable and water saving

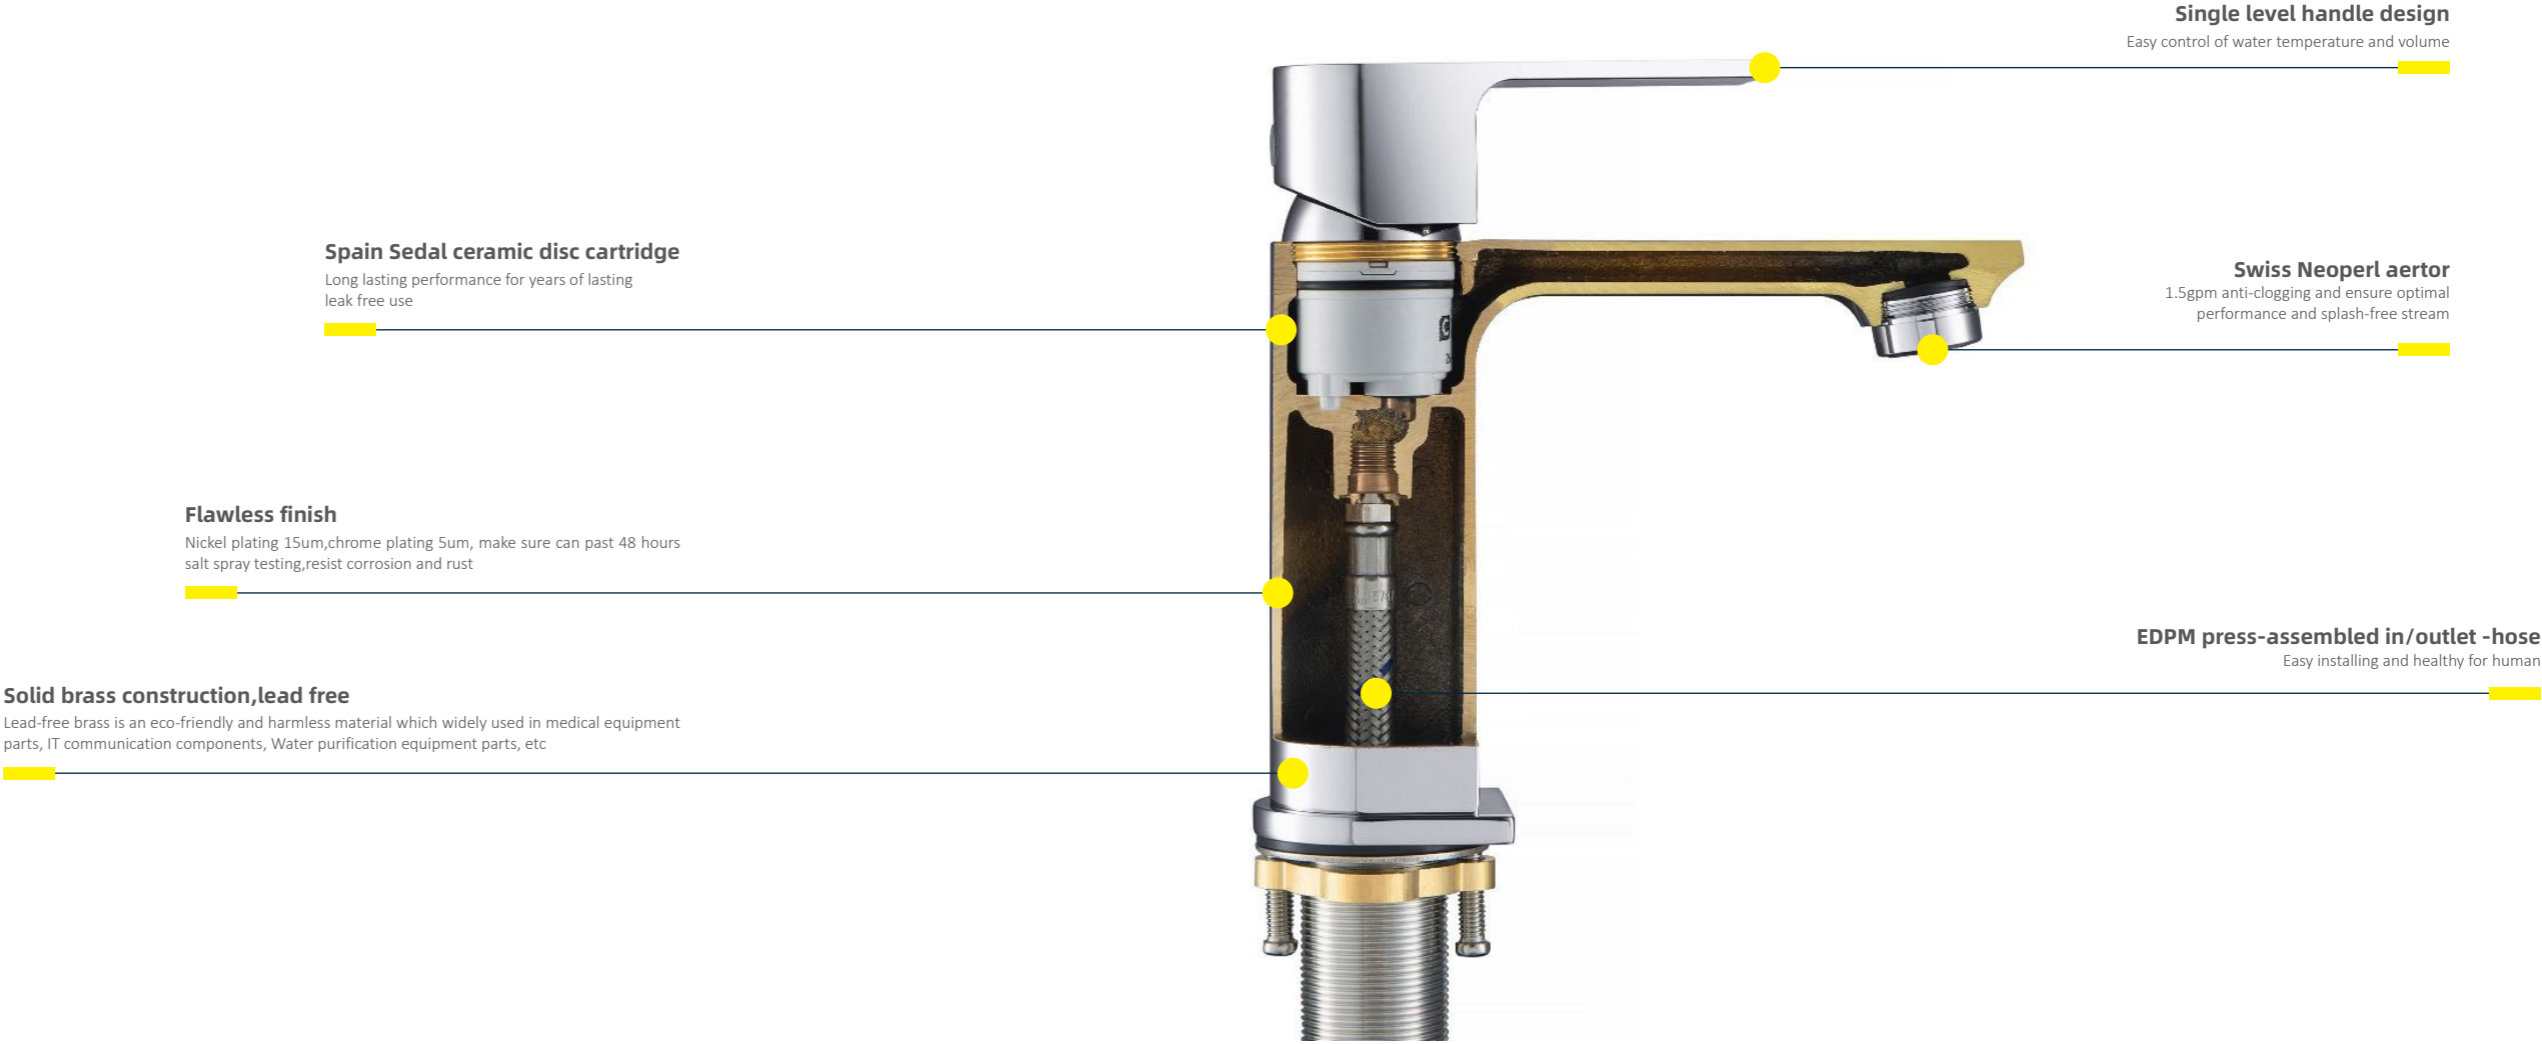

The Swiss Newper convection bubbler is used, and the air injection technology  
Comfortable water use and effective water saving

# A Lifetime of Reliable Performance

In TENNE, companies adhere to the "market-oriented" business principles, implementation of the "quality first, customer first" business philosophy instilling the manage idea of rational design, professionalization childbirth, outward appearance and inherence pay equal attention, benefit of effective guarantee consumer.

Long-last ceramic disc cartridge  
 Premium ceramic cartridge for reliable drip-free use, 10 years warranty

### Flawless finish

Customize the look to complement any bathroom design with a selection of flawless corrosion-resistant finishes

Solid brass construction, lead free  
 Corrosion-resistant & constructed for maximum durability

Soft-touch adjustable aerator  
 High-efficiency aerator conserves 20% more water without sacrificing performance.

Adjustable aerator features smart lime cleaning screen and provides a soft, non-splashing stream that can easily be readjusted to the desired location in the sink

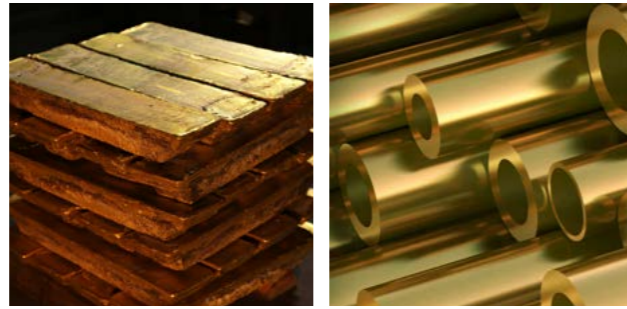

EDPM press-assembled in/outlet -hose  
 Clear vinyl surrounds flexible and durable PVC inner core tubing that's woven with polyester for added strength under pressure  
 Permanently attached stainless steel couplings and brass stems provide secure connections

Spot-free finishes  
 Faucets featuring spot-free all finishes require less cleaning and shine longer by resisting water spots, fading, and fingerprints

1. TENNE faucet bodies are made of the purest possible Brass, is resistant to soft-water corrosion and hard-water calcification making it the perfect metal for a faucet body.

2. During the foundry phase, we cast a mould using molten brass to blend the faucet. The desired shape is then extracted from the mould used

3. It refers to the metal cutting process, for the piece to reach its dimensional accuracy and shape with precision and meet design requirements.

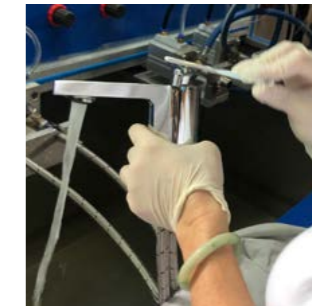

7. At TENNE, our safety standards also reflect in the packaging of our products, which not only provides safety and protection during transportation but also imparts visual appeal to our range of products.

4. After die casting comes the process of machining. This is also computer controlled process. Our cutting-edge machining process ensures that the die casted product has all its surfaces finished to a high degree of smoothness. The internal water passage ways are also smoothed for better performance during machining.

5. Electroplate, allows the product to be finished in an attractive manner allowing not only aesthetic use but also protection from acidic or high salt content water.

6. After a product is assembled and ready to use we make sure that it passes astringent Water Flow Testing to rule out any leakages in our products.

# Lasting Beauty and Quality

The AQUAVIT company has a finish option to match your style, from clean, modern chrome to classic oil rubbed bronze, to the popular Brush Nickel. Each of our finishes has been tested to ensure quality and longevity.
